

Oil wiper ring

Product functions:

- prevent any oil contaminating the cylinder
- Oil wiper ring is designed to seal the oil from the crankcase
- By scraping away the excess oil generated along the piston rod by its back and forwards movements, the oil wiper rings prevent any accidental leakage outside the crankcase.

Material:

- Bronze
- Cast iron
- Alloy
- Non-metallic etc.

Our advantages:

- High quality control
- Competitive price
- ISO9001 certification
- OEM acceptable
- Customer's 2D, 3D drawings or samples are welcomed
- Rich experience in compressor sealing field

Rod packing

Main functions:

- The purpose of packing ring is to seal (dynamic sealing) any residual gas coming from the cylinder along the piston rod.
- Different design and various of material (metallic and non-metallic) to meet all operating requirements.
- Suitable for oil & oil free working condition

Our advantages:

- High quality control
- Competitive price
- ISO9001 certification
- OEM acceptable
- Customer's 2D, 3D drawings or samples are welcomed
- Rich experience in compressor sealing field

Packing Box

- We make packing box customized in order to install various of types of packing components and oil wiper ring.
- Nitrogen filling protection design in order to reduce the accidents of poisonous gas leakage.

Material:

- Cast iron
- Alloy steel
- Our advantages:
- High quality control
- Competitive price
- ISO9001 certification
- OEM acceptable
- Customer's 2D, 3D drawings or samples are welcomed
- Rich experience in compressor sealing field
